PROFESSIONAL SUMMARY

Python developer specialising in backend API services and database optimisation. 2 years experience with agile teams, Docker-based deployments, and test-driven development.

TECHNICAL SKILLS

Python (Flask, FastAPI) • JavaScript • REST APIs • PostgreSQL • Git • Docker • pytest • Celery

WORK EXPERIENCE

Python Developer — CloudNest Technologies

Aug 2022 – Present (2 yrs)

- Developed 8 microservices in FastAPI, each independently containerised and deployed.
- Integrated Celery + Redis for asynchronous task processing of email and report generation.
- Authored comprehensive API documentation using Swagger/OpenAPI.
- Collaborated in 2-week Agile sprints; raised test coverage from 45% to 78%.

Intern – Software Development — Nexus Infotech

Jan 2022 – Jul 2022 (7 months)

- Wrote Python scripts for data processing and ETL pipelines.
- Fixed bugs in legacy Flask application and refactored database models.

EDUCATION

B.Tech – Computer Science, CCS University, 2022
