

Sunny Rajput

Jaipur, Rajasthan | +91 8920780508 | sunny.rajput@yahoo.com

PROFESSIONAL SUMMARY

Software Developer with 3 years of hands-on experience in full-stack web development using Python (Django, FastAPI) and React.js. Skilled in RESTful API design, relational database optimisation (PostgreSQL, MySQL), Docker containerisation, and agile team collaboration. Consistently delivers production-quality features on schedule.

TECHNICAL SKILLS

- Python — Django, FastAPI, Flask
- JavaScript / React.js, TypeScript
- RESTful API Design & Documentation
- PostgreSQL, MySQL
- Docker, Docker Compose
- Git, GitHub — branching, PR workflows
- GitHub Actions CI/CD
- pytest — unit and integration tests
- Linux, Nginx, Gunicorn

WORK EXPERIENCE

Software Developer — RajTech Digital, Jaipur

April 2021 – Present (3 yrs 2 months)

- Built and maintained Django + FastAPI backend for an e-commerce platform handling 8,000+ daily users and 300+ orders per day.
- Developed React.js components for product listing, cart, checkout, and order-tracking flows; improved mobile conversion rate by 18%.
- Designed RESTful APIs with versioning and OpenAPI documentation; consumed by web frontend and Android/iOS mobile apps.
- Migrated legacy MySQL database to PostgreSQL; rewrote slow queries with proper indexing, improving average response time by 40%.
- Containerised backend and frontend with Docker; automated CI/CD with GitHub Actions — tests and staging deploy run on every PR.
- Wrote pytest test suite covering 75%+ of API endpoints; integrated with pre-commit hooks to block failing code from merging.

Web Developer Intern — PixelCraft Labs, Jaipur

November 2020 – March 2021 (5 months)

- Developed Flask REST APIs and integrated them with a React.js admin dashboard.
- Managed feature branches with Git; submitted and reviewed pull requests daily.
- Wrote Postman test collections for all API endpoints; documented in Confluence.

EDUCATION

B.E. – Information Technology, RTU Kota, 2020 | CGPA: 7.7 / 10

PROJECTS

- Price-comparison scraper — Python (Scrapy) + FastAPI + PostgreSQL + Docker.
- React admin panel (TypeScript) with role-based views, used internally at RajTech.
