PROFESSIONAL SUMMARY

Software Developer with 2.5 years of experience delivering Python (FastAPI, Flask) APIs and React.js frontends in product-focused engineering teams. Strong in test-driven development, RESTful API design, PostgreSQL schema management, and Docker-based deployments. Passionate about clean code, API documentation, and agile collaboration.

TECHNICAL SKILLS

- Python — FastAPI, Flask, Django (familiar)
- JavaScript / React.js, TypeScript
- RESTful API Design, Swagger / OpenAPI docs
- PostgreSQL, MySQL
- Docker, Docker Compose
- Git, GitHub, Pull-request workflows
- pytest — unit & integration testing
- Redis (caching layer)
- Linux, Bash scripting

WORK EXPERIENCE

Software Developer — NexGen Softwares, Pune

July 2022 – Present (2 yrs)

- Built full user-authentication module in FastAPI — JWT tokens, refresh flow, role-based access control — now used by 200+ enterprise clients.
- Developed 15+ React components (TypeScript) for a data-visualisation dashboard displaying live metrics to operations teams, replacing a legacy spreadsheet process.
- Designed and documented RESTful APIs with OpenAPI/Swagger; reduced integration time for partner teams by 50%.
- Maintained PostgreSQL schemas using Alembic migrations; added indexes that cut report-generation queries from 8 s to under 1 s.
- Set up Docker Compose dev environment adopted by the full 5-person team, eliminating 'works on my machine' issues.
- Introduced pytest integration tests; raised code coverage from 38% to 76% and cut production bug rate by 30%.

Software Trainee — Sparkle IT Solutions, Pune

January 2022 – June 2022 (6 months)

- Built REST API endpoints in Flask; connected them to a React admin panel.
- Wrote API documentation and PostgreSQL schema diagrams for onboarding docs.
- Resolved 25+ GitHub issues and participated in weekly sprint reviews.

EDUCATION

B.E. – Computer Engineering, Savitribai Phule Pune University, 2022 | CGPA: 8.4 / 10

PROJECTS

- Task management REST API (FastAPI + PostgreSQL + Docker) — open source on GitHub.
- React dashboard template with TypeScript and Recharts — used internally at NexGen.
